

INCIDENT MANAGEMENT SITUATION REPORT
 MONDAY, JUNE 10, 1996 - 0530 MDT
 NATIONAL PREPAREDNESS LEVEL II

*** THE TEN STANDARD FIRE ORDERS ARE FIRM ***
 *** WE DON'T BREAK THEM; WE DON'T BEND THEM ***

CURRENT SITUATION: Thunderstorm activity continued in the Southwest Area yesterday, committing all Type I Crews, Helicopters, Airtankers and Lead Planes. Large fire activity continued in the Western Great Basin and Alaska. Fire danger is very high to extreme in the western United States.

Alaska Area Large Fires:

100 MILE CREEK, Alaska State. A Type II Incident Management Team (Stires) is assigned. This fire is burning on Fort Greeley Army Base approximately 100 miles southeast of Fairbanks. Fire activity was moderate yesterday with creeping and intermittent crowning. Objectives to hold the northern flank were accomplished. Acreage decrease was due to more accurate mapping of the fire.

CROOKED CREEK, Alaska State. A Type II Incident Management Team (Johnson) is assigned. This fire is burning on the Kenai Peninsula west of Tustumena Lake and east of the community of Ninilchik. Light rain and higher humidities aided suppression efforts. Structure protection and securing the western flank remain the top priorities. Mop-up and line rehabilitation began yesterday.

TETLIN, Alaska State. A Type II Incident Management Team (Harper) is assigned. This fire is burning on Native Corporation land approximately 30 miles southeast of Tok. Fire behavior included crowning and spotting. Crews conducted burnout operations along the Alaska Highway and the eastern flank.

MILLERS REACH #2, Alaska State. A Type I Incident Management Team (Liebersbach) is assigned. High concentrations of heat in deep fuels continue to hinder containment efforts. The current objective is securing the western flank. United States Senator Stevens toured the fire yesterday, and will attend the briefing this morning. The Structure Safety/Public Information Branch continues to identify hazards around the fire.

GRAVEYARD CREEK, Alaska State. A Type II Incident Management Team (Dube) is assigned. This fire is burning near Central, a small mining community 125 miles northeast of Fairbanks. Suppression crews were aided by cooler temperatures, higher relative humidities, and light showers yesterday. Mop-up and line rehabilitation will continue today.

Southwest Area Large Fires:

SAN PEDRO, New Mexico State. A Type II Incident Management Team (Macdonald) is assigned. The fire is burning in dense old growth Salt Cedar and Cottonwood Bosque approximately 10 miles south of Socorro, NM on the east side of I-25. The fire burned 4-5 miles south yesterday burning onto the Bosque Del Apache Wildlife Refuge. Extensive restoration projects and experiments are threatened.

TADPOLE, Gila NF. The fire is burning approximately 15 miles northwest of Silver City, NM. Retardant drops on the fire were effective. Steep terrain is hindering suppression efforts.

SUNFLOWER, Tonto NF. This fire was started by a vehicle fire approximately 50 miles northeast of Phoenix, AZ. The fire is burning in heavy brush and Sycamore trees. Air operations were successful in meeting containment objectives.

BURGETTE, New Mexico State. This fire is burning approximately 15 miles southeast of Vaughn, NM near Highway 285. The fire started 6/8 and was declared controlled, but was rekindled yesterday afternoon. A strong line is now around the fire, but the center continues to burn.

ALLENTOWN 5, Navajo Agency, BIA. The fire is burning south of I-40 near Houck, Arizona. Afternoon temperatures in the 80's and 90's caused some torching of individual trees. Some demobilization is planned for today.

Reported

Western Great Basin Large Fires:

RAINBOW COMPLEX, Ely District, BLM. A Type II Incident Management Team (Burdick) is assigned. The Mule fire (11,240 acres) is located 45 miles north of Pioche, NV. Southwest winds continued to drive the fire to the north through pinyon-juniper fuels. Fire behavior was high to extreme with crowning, torching and spotting up to 200 yards. The Boyd fire (3,040 acres) is located 15 miles south of Caliente, NV. The fire backed into the wind and spread with short uphill runs. No unusual fire behavior was observed. Little fire growth is expected due to natural barriers. A ranch in the area is potentially threatened.

KENNEDY COMPLEX, Winnemucca District, BLM. A Type II Incident Management

Team (Martin) is assigned. This fire is located 40 miles south of Winnemucca, NV. High winds, hot temperatures and low humidities caused the fire to make a 200 acre run in upper Kennedy Canyon. Numerous open mine shafts, explosives and other hazardous materials continue to hamper control efforts.

DESERT PEAK, Carson City District, BLM. This fire is burning in grass and salt scrub on BIA land 18 miles east of Shurz, NV. The fire is being suppressed under a modified suppression strategy with 2 engines monitoring. Some isolated activity was observed yesterday on northwest and southwest flanks.

Eastern Great Basin Large Fires:

ALLRED, Utah State. Current threat is to powerlines. Low relative humidities and erratic winds were causing control problems.
